SUMMARY

Product-focused operator with approximately 2.5 years of experience in building and scaling early-stage products across marketplaces, SaaS, and platform systems. Skilled in translating user problems into MVPs, designing scalable systems, and aligning product decisions with business outcomes.

EXPERIENCE

Co-Founder | GetSwiped

Nov 2025 – Present | Bangalore

- Building a resume-less hiring platform focused on video-first candidate evaluation and real-time matching
- Defined product architecture and user flows for hyperlocal talent discovery
- Solving hiring inefficiencies (ATS bias, candidate drop-offs) through behavioral UX design and system thinking

Founder / Operator (Independent)

Jan 2025 – Oct 2025 | Gurgaon

- Executed and validated product ideas across service, marketplace, and revenue-first models
- Built and operated a **marketing platform (LUMENLEAF)** delivering websites and digital solutions for 3 clients, focusing on conversion and user journeys
- Designed and prototyped a **petcare marketplace**, structuring interactions between vets, pet owners, breeders, and shelters
- Conducted rapid validation of product ideas, prioritizing scalability, usability, and revenue feasibility

Marketing Associate | Emversity

Jun 2024 – Sept 2024

- Improved campaign ROI by 12% through data-driven optimization and user behavior insights
- Expanded partner ecosystem by 15%, aligning acquisition with product and growth strategy

Head of Core | Peershala

Apr 2024 – Jun 2024

- Built and structured core team operations; contributed to early-stage product and revenue setup

Sales Intern | Maxviewnow

Oct 2023 – Dec 2023

- Closed 5 B2B deals; developed understanding of customer pain points and sales cycles

Strategic Partnerships Intern | ImpactGuru

May 2023 – Jul 2023

- Built partnerships with hospitals, aligning stakeholder needs with platform growth

PROJECTS

BeautyOS (AI + BI Platform)

- Built an AI-integrated business intelligence platform to track market trends and user insights in the beauty industry
- Focused on decision support systems and data-driven product features

GetSwiped – System Design

- Designed a microservices-based architecture for scalable hiring workflows and real-time interaction

SKILLS

Product: Product Strategy, Product Management, MVP Development, User Research, Wireframing, System Design

Growth & Data: Growth Strategy, Conversion Optimization, Data Analysis, Go-To-Market Strategy

Business: Business Development, B2B Sales, Strategic Partnerships

EDUCATION
