

Product Manager with experience across AI, gaming, digital products, and marketplaces. Strong in roadmap ownership, cross-functional execution, and feature launches that drive engagement and business impact. Experienced in AI-driven automation, GTM, growth, market research, and data-driven decision-making across B2B, B2C, and SaaS products.

EXPERIENCE

KGeN & Humyn Labs | Associate Product manager

Bangalore | Feb 2025 - Present

- Drove product strategy for Kgen's platform (app + website), collaborating with engineering, design, and growth teams.
- Built milestone-based referral system achieving **35% referral→signup conversion** rate driving **~120K new users in 4 months**.
- Crafted FTUE flows that achieved a **55% completion rate**, leading to **80K+** users completing onboarding within the first week.
- Designed onboarding journeys with Web3 integration, enabling **1.5M + NFTs** minted as user identity artifacts; 70% of users customized their profile NFTs within 7 days.
- Implemented a UTM tracking framework across **10+ acquisition channels** to enable campaign-level attribution.
- Developed a fraud prevention mechanism that detected and **blocked ~18% of fraud signups**, ensuring fair user growth.
- Built and iterated on a production chatbot by designing conversation flows and fallback logic; analyzed CSAT, resolution rate, and drop-offs from live conversations to drive prompt and flow changes, **improving CSAT by ~15%** and **reducing unresolved queries by ~20%**.
- Launched custom in-app overlays to announce new features, achieving **45%+ click-through rates** and driving **~25% uplift** in feature adoption and campaign completion within the first week of release.
- Introduced rKade Spin & Slot games for redeeming on-platform currency, resulting in **1 billion units of in-platform currency redeemed within 2 months** and boosting daily active engagement by **18%**.
- Implemented automation workflows and AI agents (n8n, no-code tools) to streamline processes, reducing manual operational effort by **~30%**
- Shipped a **no-code e-commerce website** using Lovable and Shopify in 3 days, generating **₹10L+ in merchandise sales**.

Growtholics | Product Intern

Bangalore | Jul 2024 - Jan 2025

- Worked on CRM workflows used by sales teams to manage leads, accounts, and client follow-ups.
- Helped define and improve lead lifecycle stages (lead → qualified → converted) based on sales feedback.
- Analyzed CRM data to identify drop-offs and inefficiencies in the sales funnel.

PROJECTS

- **Tinder + | Case study to increase post match conversion**
- **Launchpad | AI-Powered Job Application Platform**
