

Professional Summary

Results-driven Project Manager with experience delivering IT services and software projects by leading requirement discovery, coordinating cross-functional teams, and managing scope, timelines, and stakeholders. Proven ability to translate client needs into executable plans, improve delivery efficiency, and reduce rework through structured documentation and clear communication. Strong technical foundation enabling effective collaboration with engineering teams.

Core Project Management Skills

- Client Requirement Gathering (BRD, SRS, User Stories)
- End-to-End Project Delivery & Coordination
- Stakeholder Communication & Expectation Management
- Sprint Planning, Task Breakdown, Agile Execution
- Scope Control, Change Management & Risk Mitigation
- Cross-Functional Team Coordination (Dev, QA, Design)

Technical Skills

Tools: Jira (Basic), GitHub, Google Sheets, Excel, VS Code

Data & Analytics: Python, SQL (Basic), Streamlit, Data Visualization

Technical Knowledge: APIs, Backend Systems, Databases, Web Applications

Professional Experience

Project Coordinator – IT Services

GHMC.ME — Surat — January 2026 – Present

- Driving end-to-end delivery of multiple client software projects, serving as the primary liaison between clients and internal technical teams.
- Leading structured requirement discovery sessions to capture business goals, technical constraints, and success metrics.
- Translating client requirements into BRDs, sprint plans, task breakdowns, and execution roadmaps for predictable delivery.
- Proactively tracking project milestones, identifying risks early, and implementing mitigation strategies to prevent delays.
- Coordinating cross-functional teams (Development, QA, Design) to ensure alignment on scope, timelines, and quality standards.
- Managing scope changes and evolving requirements while maintaining delivery commitments and stakeholder confidence.
- Providing weekly executive-level status reports with clear visibility on progress, blockers, and delivery timelines.

Impact: Contributing to improved on-time delivery and reducing requirement-related rework through structured documentation and proactive communication.

Project Coordination – Product & Dashboard Development

K2 Ventures — Bangalore — June 2025 – December 2025

- Coordinated engineering, design, and operations teams to deliver internal dashboards and monitoring tools.
- Translated operational needs into functional requirements, KPIs, and reporting metrics.
- Built dashboards using Python and Streamlit to convert raw data into actionable insights.
- Tracked sprint progress and supported timely delivery of internal tools used by leadership.

Impact: Improved leadership visibility into operational metrics and reduced manual reporting effort.

Relevant Projects

Car Rental Management System

- Designed core user journeys including onboarding, booking, pricing, and admin workflows.
- Coordinated requirements to align business workflows with technical feasibility.
- Supported feature prioritization and ensured smooth handoff to development teams.

E-Commerce Platform

- Planned and coordinated development of authentication, product catalog, and order management features.
- Translated business requirements into backend APIs and scalable data models.
- Ensured alignment between business goals, scalability requirements, and delivery timelines.

Education

B.Tech in Computer Science

Abacus Institute of Engineering and Management (MAKAUT)

CGPA: 8.71 / 10

2020 – 2024
