

Product Associate with 3+ years of experience in B2C. I maximize my impact on driving product scalability and business growth by solving user problems while balancing revenue and operational impact. I work through systematic problem-solving frameworks, qualitative research, and close collaboration with cross-functional teams. I’m currently looking to apply these skills in a high-growth company environment.

Product Associate

amberstudent | March 2024 - current

- Led research, discovery, and **PRD for a University white-label solution** by identifying university websites as a key decision-making touchpoint for students; scaled it across 30+ university pages, unlocking a new acquisition channel with **~50% user conversion and zero paid CAC**.
- Improved **conversions for low-performing property** listings by diagnosing property images as a major drop-off driver and optimizing UI using user behaviour insights, resulting in a **18% lift in booking conversions**- worked closely with data and inventory teams.
- Shipped an internal ticketing tool from concept to production by **defining product flows** and validating a production-ready POC with engineering; replaced a third-party solution (Suptask) and **saved ~\$20K annually**.
- Led migration of **key content sections from CSR to SSR**, optimizing page load time, **improved SEO crawlability & page rankings** as a PLG project.
- Improved adoption of an internal CRM chatbot by **shadowing 20+ users** to understand daily workflows, identifying key friction points around bot placement, performance, and accuracy, and shipping targeted fixes that increased **active usage from 3 to 200 users**.
- **Drove release execution** of a new web-view mobile app, identifying and closing 80+ issues, supporting rollout strategy, and setting up dashboards to monitor post-launch health.

Product & Growth

Fampay | June 2023 - Sept 2023

- Ran **A/B experiments** for a revenue project “missions”, by testing varied UI copies that led to 4x more user adoption & 3x increase in revenue.
- Spoke to 70+ users to diagnose drop-offs on the Custom UPI feature, that lead to UX tweaks driving a 3x revenue lift.
- Led **early GTM execution for NamasPay** (UPI for foreigners) by identifying acquisition channels and building partnerships with travel aggregators, helping onboard the **first 3,000 active users**.

Community Experience Director & Founder

Raṭī | June 2020 - Aug 2024

- Built an offline discussion community focused on under-explored and polarized topics; drove 5→600+ attendee participation by designing structured discussion formats across 30+ monthly Raṭī sessions.

Product & Business Operations

Freggie Fermentary | June 2020 - May 2024

- Built and scaled a food D2C brand, making ₹1L in profits; owning manufacturing, supply chain, pricing, and P&L; reduced costs by ~50% and launched 8 products.
