SUMMARY

Product Manager with 8+ years building and scaling high-impact consumer fintech products across payments, compliance, and automated investment systems. Proven track record driving measurable conversion improvements, reducing friction in regulated money-movement workflows, and leading 0→1 product launches in ambiguity-heavy environments. Strong cross-functional leader partnering with Engineering, Risk, and Operations to deliver scalable, data-driven outcomes. Experience designing and shipping LLM-powered systems with structured evaluation and reliability frameworks.

CORE SKILLS

- **Product:** 0→1 Launches • Consumer Growth • Payments & Compliance • Roadmapping • Experimentation • Metrics & KPIs
- **Data:** Funnel Optimization • Behavioral Drop-off Analysis • Conversion Improvement • Cost Efficiency
- **AI Systems:** LLM Product Design • Evaluation Frameworks • Reliability & Confidence Modeling

EXPERIENCE

Product Manager

Western Union – Pune

February 2024 – August 2025

- Owned end-to-end sender and receiver journeys for regulated cross-border payment flows across multiple LACA markets, balancing compliance, conversion, reliability, and transaction integrity at scale.
- Led redesign of first-time user KYC onboarding in partnership with third-party verification vendors and compliance teams; introduced clearer status transparency and recovery flows, increasing successful verifications by **36%** while maintaining regulatory adherence.
- Improved transaction conversion by **18%** by simplifying high-friction compliance steps and error-recovery flows, unlocking approximately **\$1.6M in incremental monthly transaction value**.
- Launched multilingual, AI-powered support and intent-resolution flows with human-in-the-loop safeguards, reducing inbound support tickets by **~80%** while preserving accuracy, and customer trust.
- Partnered with regional, engineering, and compliance teams to launch digital payment experiences across **Peru, Panama, and Argentina**, driving **24–28% transaction growth** across markets.
- Owned product roadmap and success metrics for regulated payment journeys; managed and mentored **2 Associate Product Managers**, driving delivery outcomes within an Agile product team.

Product Manager

Jar App – Bengaluru

November 2021 – September 2023

- **Founding Product Manager** for mandate-based automated investment products enabling daily auto-debit investments within tightly regulated money-movement workflows.
- Designed and scaled recurring payment systems, driving a **25% increase in recurring automated**

transactions while improving mandate reliability and success rates.

- Owned onboarding and mandate setup journeys, reducing drop-offs in regulated consent and debit flows through behavioral drop-off analysis and UX iteration.
 - Led user research and structured experimentation driving a **109% increase in one-time investments**.
 - **Established core product foundations from zero**, defining product vision, roadmap, success metrics, and backlog prioritization to support rapid scale.
 - Instrumented key payment and investment events, reducing development rework by **~20%** and improving cross-team clarity.
-

Product Owner/Business Analyst

Forsys Inc. – Hyderabad

June 2020 – October 2021

- Owned **Salesforce-based enterprise workflows**, translating requirements into scalable cloud products.
 - Led global stakeholder workshops and delivered **Agile user stories with SQL-backed insights**.
-

Software Engineer

Accenture – Pune

October 2014 – November 2017

- Built billing and invoicing systems for global telecom and B2B clients.
 - Led automation initiatives reducing invoice disputes by **30%**.
-

AI PRODUCT DEVELOPMENTS

Pathfinder — LLM-Powered Career Intelligence Platform (0→1)

February 2026 – Present

- Designed a 0→1 **LLM-powered career intelligence platform** that converts unstructured user inputs into personalized career recommendations using structured AI reasoning.
 - Designed **confidence signaling and ambiguity-handling frameworks** to improve trust in AI outputs, while defining evaluation metrics for recommendation quality, clarity, and engagement.
-

Independent Product Exploration — AI Job Search Automation

September 2025 – January 2026

- Evaluated LLM latency, token cost, and reliability trade-offs in human-in-the-loop automation workflows.
 - Identified scalability constraints in UI-dependent automation systems and made principled decisions against high-maintenance architectures.
-

EDUCATION

MBA in Marketing — Great Lakes Institute of Management, Chennai | **2020**

Bachelor of Technology — St. Thomas' College of Engineering & Technology, Kolkata | **2014**
