
Professional Summary

Product Manager with a background in warehouse operations and supply chain execution before transitioning to tech. 3 years in PM roles at a supply chain SaaS startup — the only PM on the product for the first 18 months. Understand how freight and warehousing teams think because I've worked in those rooms.

Work Experience

Product Manager

TrackEasy Solutions Pvt. Ltd. (Supply Chain Visibility, Series A), Pune · Jan 2023 – Present

- Took over as sole PM when the founding PM departed; owned roadmap, discovery, and delivery for the next 14 months without a manager above in the product function
- Shipped live tracking module for LTL shipments — feature designed after spending 3 weeks with operations teams at 4 FMCG and pharma clients across Maharashtra
- Killed a supplier portal feature 3 weeks after launch when adoption data showed the problem was not where we thought it was; redirected the sprint capacity to a warehouse exception alert that became the product's highest NPS feature
- Worked with engineering to build a basic integration with CargoWise One — opened up 5 freight forwarder accounts that had been stalled for 6 months
- Currently managing a 3-person engineering team and a contract designer; first full product hire below me joined in January

Warehouse Operations Executive

Aramex India Pvt. Ltd., Pune · Aug 2020 – Dec 2022

- Managed inbound sorting, put-away, and dispatch operations for an e-commerce fulfilment hub processing 6,000–8,000 orders daily at peak
- Ran the returns processing team of 12 during an 8-week peak period — designed a triage process that reduced returns cycle time by 2 days and eliminated the backlog
- Built a shift handover checklist after a recurring miscommunication between shifts was causing delayed dispatches
- adopted across 3 other hubs within 2 months
- Worked directly with the transport team on last-mile allocation and rescheduling; understood the carrier relationship from the warehouse side

Education

B.E., Mechanical Engineering · Pune Institute of Computer Technology (PICT), Pune · 2016–2020 · First Class
