

Prashant Kumar

Product Manager

+91 99001 43278 · squad_6@pg27.mesaschool.co · Bengaluru · [linkedin.com/in/prashant-pm](https://www.linkedin.com/in/prashant-pm)

Professional Summary

Product Manager with 4 years of experience in B2B SaaS — CRM, workflow automation, and analytics products. Strong in discovery, PRD authoring, and cross-functional execution. MBA from TAPMI. Led a supply chain automation project during an engagement that gave me exposure to how logistics firms manage their data. Looking to apply product skills to a more operationally complex domain.

Work Experience

Product Manager

WorkflowAI Technologies (B2B SaaS, 90 employees), Bengaluru · Aug 2022 – Present

- Owns the workflow automation and integration module — 200+ enterprise clients across manufacturing, retail, and logistics verticals
- Shipped 14 features over 2 years; maintained 85%+ adoption on launched features tracked at 90-day mark
- Led a supply chain vendor management feature that required 6 weeks of discovery with logistics procurement teams at 4 manufacturing companies — closest I have come to understanding how freight and vendor data flows in a real ops environment
- Manages a 3-person squad: 2 engineers and 1 designer; reports to VP Product
- Introduced OKR-based roadmap planning; first PM at the company to measure feature success at 30, 60, and 90 days post-launch

Associate Product Manager

Salesken AI (Conversation Intelligence SaaS), Bengaluru · Jul 2020 – Jul 2022

- Supported PM on the call analytics and coaching dashboard — owned 3 features from spec to release in 2 years
- Led discovery for a new logistics vertical pilot — interviewed 8 freight forwarding sales managers; built the feature spec that became the first domain-specific product offering
- Analysed 2,000+ support tickets to identify top UX friction points; resulting insights drove a settings redesign that reduced support volume by 18%
