
Professional Summary

Product Manager with 3 years in B2B SaaS, preceded by 2 years in management consulting with exposure to supply chain and logistics clients. MBA from IIM Kozhikode. Comfortable working with operationally complex clients — spent 14 months on a freight and logistics process redesign project at Deloitte. Looking to build closer to the problem.

Work Experience

Product Manager

Procol Technologies (Procurement SaaS, Series B), Gurugram · May 2022 – Present

- Owns the vendor management and auction module — used by procurement teams at 80+ manufacturing, pharma, and logistics companies
- Shipped an integration with 3 ERP systems (SAP, Oracle, Tally) that unlocked 12 enterprise accounts that were blocked on integration requirements
- Led discovery for a freight rate benchmarking feature by speaking with logistics procurement heads at 6 client companies — the only product feature I have owned where I had genuine prior context from the Deloitte engagement
- Reports to Head of Product; owns 1 feature area autonomously, co-owns 2 others with a parallel PM
- Introduced fortnightly customer calls as a structured practice; previously discovery happened only before roadmap planning

Consultant

Deloitte Consulting India Pvt. Ltd., Mumbai · Jul 2020 – Apr 2022

- Worked on supply chain process redesign and digital transformation projects for manufacturing and logistics clients
- Spent 14 months on a freight and logistics management project for a large FMCG company — mapped freight procurement, carrier management, and freight audit processes across 8 plant locations
- Built process maps and gap analysis reports; presented findings to VP Supply Chain and VP Finance; was in the rooms where the decisions were made but not the one making them
- One engagement at a 3PL: mapped warehouse inbound and outbound processes for a network redesign project
