PROFESSIONAL SUMMARY

Transitioning from a data analyst background into product management. 4 years of experience building analytics infrastructure and BI dashboards for product and marketing teams. Strong in data, SQL, and defining metrics. Now looking to own the product side — not just measure it. Completed a product management certification programme in 2024.

WORK EXPERIENCE

Product Analyst → Senior Product Analyst

InMobi (Mobile Advertising Platform, 1000+ employees), Bengaluru · Jul 2020 – Present

- Built and maintained the product analytics infrastructure for InMobi's publisher monetisation platform — 200+ dashboards across 12 product areas
- Defined measurement frameworks for 8 product launches; worked with PMs to set success metrics and track outcomes post-launch
- Ran SQL-based funnel analysis for the ad auction and targeting features; findings presented monthly to the product leadership team
- No direct product ownership — role is analytical support for product managers; decisions on what to build owned by PM team
- Completed Product School PM Certification in Jan 2024 as a step toward transitioning into a PM role

Data Analyst

PubMatic (Programmatic Advertising), Pune · Jun 2018 – Jun 2020

- Built advertiser performance reports and yield optimization dashboards for the India sales team
- Automated 14 recurring reports using Python and SQL; reduced the team's weekly reporting effort by 8 hours

EDUCATION
