PROFESSIONAL SUMMARY

Senior Product Manager with 7 years of experience in enterprise SaaS — supply chain systems, ERP integrations, and B2B platform products. MBA from IIM Bangalore. Strong in complex technical product delivery, stakeholder management across procurement and IT teams, and operating in structured enterprise environments. Looking to move closer to the operational domain that the products I've built serve.

WORK EXPERIENCE

Senior Product Manager – Supply Chain Platform

SAP India Pvt. Ltd., Bengaluru · Apr 2021 – Present

- Senior PM for SAP's Supply Chain Management (SCM) module for the India market — responsible for localisation features for GST, e-Way Bill, and multi-modal freight rate management
- Managed roadmap alignment across 3 customer advisory boards — 12 enterprise clients across manufacturing, FMCG, and chemical sectors
- Shipped e-Way Bill auto-generation feature that became mandatory for all India-market clients; coordinated with GSTN API team and 8 client IT teams simultaneously
- Works within a 20-person product organisation at SAP India; owns one module in a large platform; most roadmap decisions require sign-off from HQ in Germany
- Strong in requirements documentation, enterprise alignment, and compliance-driven product delivery; less experience with rapid iteration and feature kill decisions

Product Manager

Oracle India Pvt. Ltd., Bengaluru · Jun 2018 – Mar 2021

- PM for Oracle Transportation Management (OTM) — India-specific features for road freight and multi-modal shipment tracking
- Delivered 4 India-specific freight features across 3 years; each feature required 6–8 months from requirement to release due to enterprise QA processes
- Built functional specifications for integration with FASTAG, VAHAN, and GPS tracking systems used by Indian fleet operators
- Discovery process was structured but desk-based: requirements gathered through client workshops and account manager feedback, not field visits
