

Manish Agarwal

Senior Product Manager

+91 97652 31089 · squad_4@pg27.mesaschool.co · Delhi NCR · [linkedin.com/in/manishagarwal-product](https://www.linkedin.com/in/manishagarwal-product)

Professional Summary

Product Manager with 6 years of experience — 2 years in manufacturing plant operations followed by 4 years in industrial IoT and supply chain SaaS product management. Strong operational foundation from the plant floor; now applying it to building software for manufacturing and supply chain teams. Work best when close to the problem and the people experiencing it.

Work Experience

Senior Product Manager

Altizon Systems (Industrial IoT & Manufacturing SaaS, 200 employees), Pune · Jan 2022 – Present

- Senior PM for the supply chain visibility and production scheduling modules — 60+ manufacturing clients across automotive, electronics, and FMCG sectors
- Led the design of a supplier integration feature after spending 3 days at a Tier-2 auto component plant understanding how supplier delivery schedules are tracked manually — good discovery foundation, feature took 8 months from concept to launch
- Manages a junior PM; owns this module with a VP Product above reviewing key roadmap decisions quarterly
- Annual planning cycle driven by enterprise contracts and customer advisory board inputs; rapid iteration difficult given 6–8 month release cadences
- Strong at technical requirement writing, manufacturing domain understanding, and large stakeholder management; less exposure to short-cycle iteration and independent go/no-go calls

Product Manager

Altizon Systems, Pune · Sep 2020 – Dec 2021

- PM for the machine connectivity and OEE (Overall Equipment Effectiveness) dashboard product
- Shipped a new alerting engine for production line exceptions; designed after on-site visits at 3 client plants
- Worked directly with plant engineers and production managers on requirements — stronger on domain understanding than on speed of delivery

Production Engineer

Bharat Forge Ltd. (Auto Components, 5000+ employees), Pune · Jul 2018 – Aug 2020

- Managed precision forging line operations — planning, quality, and shift supervision across 2 production lines
- Led a 4-month downtime reduction project: root-caused top breakdown causes, revised PM schedule, reduced machine downtime by 18%
- Coordinated with logistics team on inbound material scheduling — understanding how materials reached the plant floor

Education

B.Tech, Mechanical Engineering · NIT Jaipur · 2014–2018 · CGPA 8.1/10
