Professional Summary

Senior Product Manager with 6 years of experience — began in hospital operations and healthcare supply chain, moved into health-tech SaaS product roles. Strong in operational environments with high accountability and tight workflows. Owned product areas independently at two early-stage companies. Looking to apply operational product thinking to a different domain.

Work Experience

Senior Product Manager

Innovaccer (Health-Tech SaaS, 700+ employees), Bengaluru · May 2022 – Present

- Senior PM for the supply chain and inventory management module for hospital systems — hospital pharmacy, medical devices, and consumables tracking
- Spent first 60 days embedded with hospital supply chain teams at 3 partner hospitals in Bengaluru; strong user empathy from the field, good discovery foundation
- Shipped a real-time inventory alert system that reduced stockout incidents at partner hospitals by 31% over 6 months
- Works within a 12-person PM organisation; owns one module independently; strategic decisions reviewed by CPO quarterly
- Pattern of ownership: strong within scope, but scope is bounded by a structured enterprise product organisation

Product Manager

Practo (Health-Tech, 300 employees), Bengaluru · Jul 2020 – Apr 2022

- PM for the hospital operations platform — bed management, OT scheduling, and discharge workflow modules
- Built the OT scheduling module from scratch: designed after 6 weeks of fieldwork at 4 hospitals; launched in 12 weeks
- Was the only PM on this product area for 18 months; reported directly to CTO
- Killed a patient transfer coordination feature 2 months post-launch — adoption was low and the workflow it digitised was actually better handled with a phone call in most cases

Operations Executive – Hospital Administration

Manipal Hospitals, Bengaluru · Aug 2018 – Jun 2020

- Managed OT scheduling, bed allocation, and inter-department coordination for a 350-bed multi-specialty hospital
- Implemented a new patient discharge checklist that reduced average discharge processing time by 40 minutes
- Coordinated with the medical supplies team on daily inventory requirements — understood the hospital supply chain from inside the wards

Education

MBA, Healthcare Management · Symbiosis Centre for Health Care, Pune · 2016–2018
